DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-7 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-2,4, and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nigam in view of Fukaya.

Nigam discloses a spindle motor for a disk driving device comprising a housing holding a stator (19) electrically connectable to a circuit board (3) and a rotor at an outer circumference of which a magnet (21) is provided, which are supported mutually rotatively through a shaft (33) and a bearing (21), wherein the housing is made of a resin and plastic (col. 17, ln. 62-66). But, Nigam does not disclose the housing is unitarily formed by injection molding.

Fukaya discloses a motor having a housing (32) is unitarily formed by injection molding (col. 5, lines 5-15).

Art Unit: 2834

It would have been obvious to one of ordinary skill in the art at the time the invention was made utilize the motor structure of Nigam and modify the housing of housing of Nigam to replace the housing as taught by Fukaya to provide a motor housing with a low cost in manufacturing.

Regarding claims 4, and 6, Fukaya also discloses the housing and an electric supply connector are molded in a unitary manner.

4. Claims 3 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nigam in view of Fukaya as applied to claim 1 above, and further in view of Schick.

Nigam and Fukaya disclose essentially claimed invention except for the housing and a spacer between the bearings are molded in a unitary manner.

Schick discloses the housing and a spacer between the bearings are molded in a unitary manner (112, fig. 10) for the purpose of reducing step assembly and less cost in manufacturing.

It would have been obvious to one of ordinary skill in the art at the time the invention was made utilize the combination motor structure as taught by Nigam and Fukaya accommodate the housing and the bearing spacer are molded in a unitary manner to provide a motor with reducing steps in assembly and less cost in manufacturing.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 2834

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
